# Frame title: Theorem environment

- Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus.

**Definition (Optional text: Group homomorphism)**

Let $f : G \to H$ be a map between groups. We say that the map $f$ is *group homomorphism* if it satisfies the following condition:

$$\forall x, y \in G,\ f(xy) = f(x)f(y).$$

# Frame title: aaa

**Theorem (Fundamental theorem of homomorphisms)**

For a group homomorphism $f : G \to H$, the the following isomorphism holds:

$$G/\operatorname{Ker} f \simeq \operatorname{Im} f,\ [x \operatorname{Ker} f] \mapsto f(x).$$

- Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla.
